Who are we?

Travel-Systems is dedicated to online travel solutions with a multi-skilled team of travel, IT, and software engineering experts as a cornerstone. Consultants, programmers, and many other specialists combine their technical talent with the exceptional knowledge of online travel specifics to implement a comprehensive system essential for effective operations.

Over 50 years of experience in the travel industry and 15 years in the web and online industry combined.

What do we believe in?

We strongly believe that:

The future of travel companies is online and precisely in IT. The travel market is in need of customized and tailor-made solutions built on a robust and scalable core-product infrastructure. These solutions, serving the needs of companies with sophisticated processes and operations, will reduce complications, operational costs, and overheads, thus increase profit margins.

What do we do?

We design creative and pioneering products based on a full understanding of the travel industry as well as a proven experience in the web and the software development industry. Our offers consist of a new generation of reservation systems as well as online solutions for key players of the travel business:

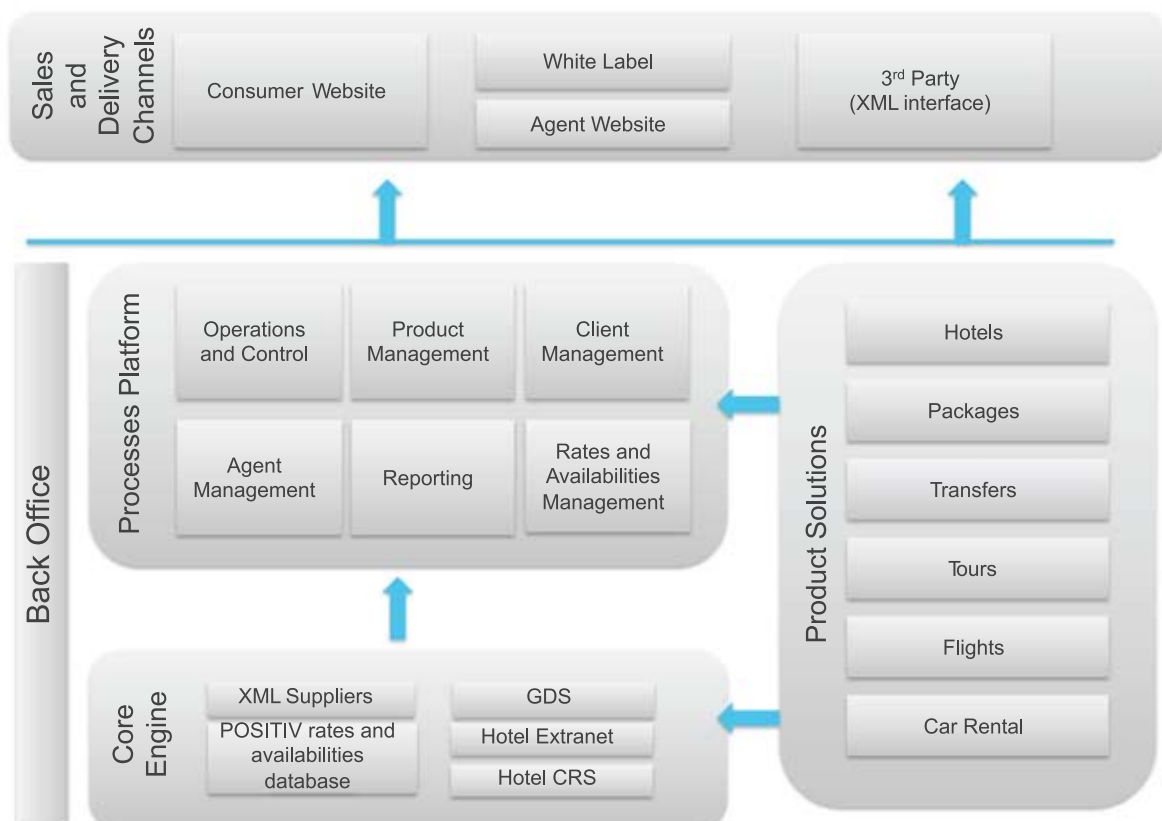

- ▶ Tour Operators
- ▶ Hotels
- ▶ Travel Agents
- ▶ Destination Management Companies
- ▶ Car Rental Companies
- ▶ Event Planners and Organizers

We also grant you the experience of our experts by providing e-tourism, travel, web, and e-commerce consulting services.

Our objectives are to:

- ▶ Satisfy our clients' needs and requirements
- ▶ Propose consistent and ground-breaking solutions
- ▶ Develop online reservations in the region
- ▶ Allow you to be ahead in your business
